

Mackenzie International Small Cap

Investment philosophy

The team believes that deep fundamental research and regional expertise are critical to successful international small-cap investing. The strategy seeks to capitalize on small-cap equity volatility by identifying unique business models and exercising patience for buying opportunities at attractive valuations. The team leverages long-term secular themes within a universe of under-researched small companies.

Strategy objective

Provide long term capital growth by investing in small cap stocks outside of North America. The annualized excess return objective for the strategy is 1.5 - 2.0% over a full market cycle with a targeted tracking error of 4% relative to the MSCI EAFE Small Cap Index, has remained consistent since the inception of the strategy.

Firm Overview

Mackenzie Financial Corporation, Mackenzie Investments Corporation, Mackenzie Investments Europe Limited and Mackenzie Investments Asia Limited (collectively "Mackenzie Investments") provide investment management and related services through multiple distribution channels. Assets under management as at December 31, 2023 were \$146.1 Billion. We provide our investment management through mutual funds, pooled funds, segregated accounts, and separate accounts for retail and institutional investors. Mackenzie Investments is dedicated to generating consistent long-term investment returns for its clients. The Firm is a member of the IGM Financial Inc. (TSX:IGM) group of companies.

On October 19th, 2017, the investment management functions of Investors Group and Mackenzie Investments joined together to form a single global investment management organization under Mackenzie Investments. This resulted in the 2017 increase in total firm assets for Mackenzie Investments. There was no change of ownership impact to the two firms' mutual parent, IGM Financial. On March 23, 2018, Mackenzie Investments Corporation commenced investment advisory operations. On January 1, 2019, I.G. International Management Limited (now Mackenzie Investments Europe Limited) and I.G. Investment Management (Hong Kong) Limited (now Mackenzie Investments Asia Limited) became part of Mackenzie Investments. On December 22, 2020, Greenchip Financial Corp. became part of Mackenzie Investments. On December 31, 2020 GLC Asset Management Group Ltd. became part of Mackenzie Investments.

Compliance Statement

Mackenzie Investments claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Mackenzie Investments has been independently verified for the periods January 1, 2008 through December 31, 2021. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The International Small Cap Equity composite has had a performance examination for the periods January 1, 2009 through December 31, 2021. The verification and performance examination reports are available upon request. See "Contact Information" below.

Composite Description

The International Small Cap Equity Composite seeks to provide significant long-term capital growth by investing in a diversified portfolio of smaller international companies with below average market capitalization. The investment approach of the strategy is based on the principles of value investing. The Composite will primarily invest in developed markets but may also invest in emerging markets and will generally be fully invested. The composite was created on January 1, 2019 and the inception date is January 1, 2009.

Benchmark Description

The benchmark is the MSCI EAFE Small Cap Total Return Index, net of withholding taxes. The MSCI EAFE Small Cap Index is a free float adjusted, market capitalization weighted index that is designed to measure the small cap equity market performance of developed markets in the world, excluding US and Canada. It consists of 21 developed market country indices.

Reporting Currency

Valuations and composite performance are reported in U.S. dollars. The composite includes Canadian dollar portfolios that have been converted to U.S. dollars.

Internal Dispersion

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Internal dispersion is only calculated for those composites which have at least 6 accounts for the full year.

Ex-Post Standard Deviation

The 3-year annualized standard deviation measures the variability of the gross composite and benchmark returns over the preceding 36-month period.

Fees

The maximum fee for the strategy is 0.90% per annum.

Performance History

Performance prior to January 2019 occurred while the investment management team was affiliated with I.G. International Management Limited. The investment management team has managed the composite since its inception, and the investment process has not changed. The historical performance has been linked to performance earned at Mackenzie Investments.

List of Composites and Pooled Funds

A list including composite descriptions, pooled fund descriptions for limited distribution pooled funds, and broad distribution funds is available upon request. See "Contact Information" below.

Performance Calculations

Gross of fee returns are calculated before management, operating and other fees but after all trading expenses and withholding taxes. For Canadian Exchange Traded Funds, gross of fee performance is calculated by geometrically adding the pro-rated monthly percentage of the total net Management fee expense ratio to the monthly net return. This methodology applied to both Canadian Exchange Traded Funds and Mutual Fund accounts prior to April 1, 2023. Gross composite performance is calculated by asset weighting the individual account returns using beginning of period market values. Net composite performance is calculated using a model fee and reflects the deduction of the maximum fee which may include Investment management and administration fees. Net of fee performance is intended to illustrate the impact of fees on performance of the composite. Actual investment advisory fees incurred by clients are typically negotiated on an individual basis and may vary depending upon, among other things, the applicable fee schedule and portfolio size.

Valuation principles

Investments listed on a public securities exchange or traded on an over-the-counter market are valued at the closing price. Where no closing price is available, the last sale or close price is used. Unlisted or non-exchange traded investments, or investments where the last price is unavailable or investments for which market quotations are, in Mackenzie's opinion, inaccurate, unreliable, or not reflective of all available material information, are valued at their fair value as determined by Mackenzie using appropriate and accepted industry valuation techniques including valuation models.

The fair value determined using valuation models requires the use of inputs and assumptions based on observable market data including volatility

and other applicable rates or prices. In limited circumstances, the fair value may be determined using valuation techniques that are not supported by observable market data.

Additional information regarding policies for valuing portfolios, calculating performance, and preparing GIPS® reports are available to prospective clients upon request. See "Contact Information" below.
