Upcoming fund launches at Mackenzie Investments

On December 16, Mackenzie will launch two new mutual funds to enhance its product line-up.

- Mackenzie Global Dividend Enhanced Yield Fund
- Mackenzie Global Dividend Enhanced Yield Plus Fund

About the funds

These income-oriented funds aim to provide investors with a stable, tax-efficient cash flow, as well as capital appreciation.

These strategies will be managed by the [Mackenzie Global Equity & Income Team](#), who also manage the Mackenzie Global Dividend Fund. The two new funds are an extension of the team's long-only strategies by using option writing to facilitate the team's buy and sell discipline.

While the new funds use similar strategies, the Mackenzie Global Dividend Enhanced Yield Plus Fund is a liquid alternative fund that will also employ leverage to enhance the fund's yield.

Details to assist in setting up the funds can be found [here](#).

Additional information can be obtained from the FD file, available through Fundserv with an effective date of December 16.
